Cell Differentiation and Development, 29 (1990) 233–234
Elsevier Scientific Publishers Ireland, Ltd.

Contents Volume 29

No. 1

The initiation of development at fertilization (*Review*)
D. Epel (U.S.A.) 1

Requirement for G protein activity at a specific time during embryonic chick myogenesis
R.E. Hausman, H. ElGendy and F. Craft (U.S.A.) 13

Phalloidin inhibits cortical granule exocytosis and ooplasmic segregation in loach eggs
V.V. Ivanenkov, A.A. Minin and S.G. Ozerova (U.S.S.R.) 21

Is ubiquitin involved in the dedifferentiation of higher plant cells?
E. Jamet, A. Durr, Y. Parmentier, M.-C. Criqui and J. Fleck (France) 37

Characterization of MPF activation by okadaic acid in *Xenopus* oocyte
H. Rime, D. Huchon, C. Jessus, J. Goris, W. Merlevede and R. Ozon (France, Belgium) 47

Effects of medium and substratum on ovine satellite cell attachment, proliferation and differentiation in vitro
M.V. Dodson, B.A. Mathison and B.D. Mathison (U.S.A.) 59

The behaviour of cells from the distal tips of quail wing buds when grafted back into chick wings after micromass culture
C.P. Cottrill, A. Crawley and C. Tickle (U.K.) 67

No. 2

Direct transdifferentiation: can cells change their phenotype without dividing?
W.A. Beresford (U.S.A.) (Review) 81

Extracellular matrix production by embryonic epithelium cultured on type IV collagen Deposition of a primary corneal stroma-like structure containing large irregular type I fibrils without type II collagen
F. Ruggiero, A. Barge, J.-L. Coll and R. Garrone (France) 95

Leukocyte surface markers in *Rana catesbeiana*, identified using mouse monoclonal antibodies
K. Sugiyama, A. Amenomori and K. Hatakeyama (Japan) 105

Uncoupling of muscle-specific protein expression in myocyte × myoblast heterokaryons
W.E. Wright and V.K. Lin (U.S.A.) 113

Electroporation as a new technique for producing transgenic fish
K. Inoue, S. Yamashita, J.-i. Hata, S. Kabeno, S. Asada, E. Nagahisa and T. Fujita (Japan) 123

Regulation of oocyte number during oocyte differentiation in the lizard *Podarcis sicula*
P. Andreuccetti, C.M. Motta and S. Filosa (Italy) 129

Maintenance of compaction and adherent-type junctions in mouse morula-stage embryos
I. Reima (Finland) 143

No. 3

Review

Stem cell potential of ductular and periductular cells in the adult rat pancreas
M.S. Rao, A.V. Yeldandi and J.K. Reddy (U.S.A.) 155

Research Papers

The silver-stained NOR and argentophilic nuclear proteins in early mouse embryogenesis: a cytological study
A.P. Dyban, E.L. Severova, O.V. Zatsepina and Y.S. Chentsov (U.S.S.R.) 165

A mouse embryonic stem cell line showing pluripotency of differentiation in early embryos and ubiquitous β-galactosidase expression
H. Suemori, Y. Kadodawa, K. Goto, I. Araki, H. Kondoh and N. Nakatsuji (Japan) 181

Cell lineage analyses of epithelia and blood vessels in chimeric mouse embryos by use of an embryonic stem cell line expressing the β-galactosidase gene
Y. Kadokawa, H. Suemori and N. Nakatsuji (Japan) 187

0922-3371/90/$03.50 © 1990 Elsevier Scientific Publishers Ireland, Ltd.

Development of cell surface activity and cell surface adhesiveness in early embryos of the newt, *Cynops pyrrhogaster*
S. Komazaki (Japan) 195

Structural modifications of the nuclear components during lizard oogenesis in relation to the differentiation of the follicular epithelium
C. Taddei and P. Andreuccetti (Italy) 205

Rapid Communication
The gastrulating chick blastoderm contains 16-kDa and 14-kDa galactose-binding lectins possibly associated with an apolipoprotein
S.E. Zalik, W.J. Schneider and I.M. Ledsham (Canada) 217
